

Local COVID Vaccine Resources

COVID is still a part of our daily lives, and CSCGP is here for our community - continuously innovating our programs to ensure that no one faces cancer alone. We would like to share a message from the National Comprehensive Cancer Network (NCCN). Please see the message below with information from Dr. Robert Carlson, CEO NCCN & CSCGP Medical Advisory Board Member.

We want to share news with you about [new guidance](#) from NCCN for COVID-19 vaccinations in people with cancer.

NCCN has recently formed a COVID-19 Vaccine Committee including top hematology and oncology experts with particular expertise in infectious diseases, vaccine development and delivery, medical ethics, and health information technology. This committee has established recommendations that can help cancer care providers make informed decisions on how to protect their patients from the ongoing COVID-19 pandemic, based on available evidence plus expert consensus.

The committee's recommendations state that all people currently in active cancer treatment should get the vaccine, with some advice to consider regarding immunosuppression and timing. The full document can be found at [NCCN.org/covid-19](https://www.nccn.org/covid-19), along with other vital information about the impact of COVID-19 on cancer care.

To learn more about the committee's thoughts on this urgent need and limited data, please access the [press release](#).

Thank you Dr. Carlson and NCCN for this guidance. For some additional information, please listen to a [podcast from CSC Headquarters](#) as well as review information from the [American Cancer Society](#).

For information about vaccine distribution, visit [PA Department of Health](#); [NJ Health](#), [Delaware.gov](#).
